Re: Real Estate Appraisal Report of +/- 8.25-acres of vacant land located on
the corner of Camp Road and N. Highway 1 Cocoa, Brevard County, FL
32927
File Name: AC22-2277

At your request, we have prepared an appraisal for the above referenced property. The subject property is legally described in the accompanying report, of which this letter is hereby made a part of and incorporated therein. This report is for your exclusive use and we are not responsible for any unauthorized use.

This is an Appraisal Report as defined by Uniform Standards of Professional Appraisal Practice under Standards Rule 2-2(a). As such, it presents only summary discussions of the data, reasoning, and analyses that were used in the appraisal process to develop the opinion of value. Supporting documentation concerning the data, reasoning, and analyses is retained in our file.

The subject consists of 8.25 acres of land with approximately 1.56 acres of wetland present on the northern elevation of the property. There are currently 22 mobile home spaces and 3 RV lots dispersed over the land site. Of the mobile homes, 18 are owned by the park owners, including the office/owner's home. There are two home not fit for occupancy. The park is 100% occupied.

At the request of the client, the purpose of this appraisal is to estimate the Current Market Value of the subject property's Fee Simple estate in its "As Is" condition, effective April 7, 2022.

This letter of transmittal is not an appraisal report; however, the attached report sets forth the data, research, and analyses that support our value conclusions. Based on the appraisal described in the accompanying report, subject to the Limiting Conditions and Assumptions, we have made the following value conclusion:

Value Conclusion			
Premise	Interest Appraised	Effective Date	Value Conclusion
Current As Is Market Value	Fee Simple	4/7/2022	\$1,050,000

Please reference Page 6 of this report for important information regarding the Limiting Conditions and Assumptions; Page 9 for Extraordinary Assumptions, and Page 13 for scope of research and analysis for this appraisal, including property identification, inspection, highest and best use analysis and valuation methodology. Acceptance of this report constitutes an agreement with these conditions and assumptions.

We certify that we have no present or contemplated future interest in the property beyond this estimate of value. The appraiser has not performed any prior services regarding the subject within the previous three years of the effective date of this appraisal.

We believe you will find this report to be self-explanatory; however, you are invited to contact us should you have any questions or require further information relative to this matter. We thank you for the opportunity to provide our professional services.

Respectfully submitted,
Tuttle-Armfield-Wagner Appraisal & Research, Inc.

Limiting Conditions and Assumptions

1. Acceptance of and/or use of this report constitutes acceptance of the following limiting conditions and assumptions; these can only be modified by written documents executed by both parties.
2. The values given in this appraisal report represent the opinion of the signers as to the values as of the dates specified herein. Values of real estate are affected by an enormous variety of forces and conditions which will vary with future conditions, sometimes sharply within a short time. Responsible ownership and competent management are assumed.
3. This appraisal report covers the premises herein described only. Neither the figures herein nor any analysis thereof, nor any unit values derived therefrom are to be construed as applicable to any other property, however similar the same may be.
4. It is assumed that the title to said premises is good; that the legal description of the premises is correct; that the improvements are entirely and correctly located on the property; but no investigation or survey has been made, unless so stated.
5. The value given in this appraisal report is gross, without consideration given to any encumbrance, restriction or question of title, unless so stated.
6. Information as to the description of the premises, restrictions, improvements and income features of the property involved in this report is as has been submitted by the applicant for this appraisal, or has been obtained by the signer hereto. All such information is considered to be correct; however, no responsibility is assumed as to the correctness thereof unless so stated in the report.
7. Possession of any copy of this report does not carry with it the right of publication, nor may it be used, or relied upon, for any purpose by anyone other than the client without prior written authorization of the client and identified as such herein, and in any event, only in its entirety. Parties who receive a copy of this report as a consequence of disclosure requirements applicable to our client do not become a party to the appraiser-client relationship and do not become intended users of this report unless the parties were specifically identified as such by our client at the time of engagement for services.
8. Neither all nor part of the contents of this report shall be conveyed to the public through advertising, public relations, news, sales or other media, without the written consent of the author; particularly as to the valuation conclusions, the identity of the appraiser or the firm with which he is connected, or any reference to the Appraisal Institute, or to the SRA or MAI designations.
9. The appraiser herein, by reason of this report is not required to give testimony in court or attend hearings, with reference to the property herein appraised, unless arrangements have been previously made therefore.

10. The Contract for the appraisal of said premises is fulfilled by the signer hereto upon the delivery of this report duly executed.
11. It is assumed that there is full compliance with all applicable federal, state, and local environmental regulations and zoning laws unless noncompliance is stated, defined and considered in the appraisal report. Necessary licenses, permits, consents, legislative or administrative authority from any local, state or Federal government or private entity are assumed to be in place or reasonably obtainable.
12. The appraiser assumes that there are no hidden or unapparent conditions of the property, subsoil, or structures, which would render it more or less valuable. The appraiser assumes no responsibility for such conditions, or for engineering which might be required to discover such factors. The appraiser does not consider mineral rights.
13. All data relating to land sales, improved property sales, and comparable rentals used in this report are considered to be proprietary; that is, owned by Tuttle-Armfield-Wagner. It is provided to the client for use within this report only. Any other use or distribution of this data without the prior written consent of Tuttle-Armfield-Wagner is specifically prohibited.
14. An environmental assessment was not provided for use in this assignment. No evidence of contamination was observed during our inspection, nor did we note the presence of commonly known toxic chemicals/hazardous materials. Nonetheless, we are not qualified to inspect/evaluate a site for potential hazards or contamination. Therefore, lacking contrary information, we assume that no contamination or environmental hazards exist that would adversely affect the subject utility and/or market value. Accordingly, the market value estimate contained herein is based on the accuracy of this assumption (subject to verification via a current environmental assessment as conducted by a duly qualified environmental scientist or engineer).
15. There are no proposed judgments or pending or threatened litigation that could affect the value of the property.
16. If the property is subject to one or more leases, any estimate of residual value contained in the appraisal may be particularly affected by significant changes in the condition of the economy, of the real estate industry, or of the appraised property at the time these leases expire or otherwise terminate.
17. No consideration has been given to personal property located on the premises or to the cost of moving or relocating such personal property; only the real property has been considered.

18. The current purchasing power of the dollar is the basis for the value stated in our appraisal; we have assumed that no extreme fluctuations in economic cycles will occur.
19. The value found herein is subject to these and to any other assumptions or conditions set forth in the body of this report but which may have been omitted from this list of Assumptions and Limiting Conditions.
20. Information, estimates and opinions are verified where possible, but cannot be guaranteed. Maps and plans provided are intended to assist the client in visualizing the property; no other use of these plans is intended or permitted.
21. Unless stated herein, the property is assumed to be outside of areas where flood hazard insurance is mandatory. Maps used by public and private agencies to determine these areas are limited with respect to accuracy. Due diligence has been exercised in interpreting these maps, but no responsibility is assumed for misinterpretation.
22. It is assumed there are no encroachments, easements or other restrictions which would affect the subject property, unless otherwise stated.
23. This appraisal is to be used only for the purpose stated herein. While distribution of this appraisal in its entirety is at the discretion of the client, individual sections shall not be distributed; this report is intended to be used in whole and not in part.
24. The Americans with Disabilities Act (ADA) became effective January 26, 1992. We have not made a specific survey or analysis of this property to determine whether the physical aspects of the improvements meet the ADA accessibility guidelines. In as much as compliance matches each owner's financial ability with the cost to cure the non-conforming physical characteristics of a property, we cannot comment on compliance to ADA. Given that compliance can change with each owner's financial ability to cure non-accessibility, the value of the subject does not consider possible non-compliance. Specific study of both the owner's financial ability and the cost to cure any deficiencies would be needed for the Department of Justice to determine compliance.

Extraordinary Assumptions

An assumption is a statement or condition which is presumed or assumed to be true and from which a conclusion can be drawn. An extraordinary assumption is an assumption which if found to be false could alter the resulting opinion or conclusion. We note that the use of the following Extraordinary Assumptions might have an effect on assignment results if later found out to be untrue or faulty.

1. Information was provided by the representative of ownership regarding the number of lots, rents and income information. We assume the information provided is accurate.

Identification of Subject

The subject consists of 8.25 acres of land with approximately 1.56 acres of wetland present on the northern elevation of the property. There are currently 22 mobile home spaces and 3 RV lots dispersed over the land site. Of the mobile homes, 18 are owned by the park owners, including the office/owner's home. There are two home not fit for occupancy. The park is 100% occupied.

The subject has an assigned physical address of 308-372 Camp Rd & 4801-4841 N. Highway 1, Cocoa, Brevard County, FL 32927. The property is further identified with the following addresses from the Brevard County Property Appraiser's website.

Purpose of the Appraisal

At the request of the client, the purpose of this appraisal is to estimate the Current Market Value of the subject property's Fee Simple estate, effective April 7, 2022. Market Value and "Fee Simple" interest is defined in the Addendum.

Client

This appraisal report has been prepared for the client, Victor C. Raynor Revocable Trust, Kathleen Lenn, Trustee, P.O. Box 330, Sharpes, FL 32959.

Intended Use and User of Appraisal

The client will rely upon this appraisal for internal use, including but not limited to, rendering a decision relative to a financial transaction, asset valuation or foreclosure. No one other than the named client or any other party not identified as an intended user should use or rely on this appraisal for any purpose. Such parties are advised to obtain an appraisal from an appraiser of their own choosing if they require an appraisal for their own use.

Owner of Record and Sales History

The Brevard County Property Appraiser's Record Card indicates current ownership of the subject site is listed as Victor C. Raynor Revocable Trust. We completed a search of several multiple listing services and did not discover any current listings of the subject property. The subject last sold in 1980 for \$57,900. The subject is not currently under contract nor listed for sale.

Existing Leases, Rental or Use Agreements

The subject is vacant land zoned for mobile home use. According to the managers, the lots rent for \$300 to \$350 per month and the mobile homes rent for \$675 to \$975 per month.

Legal Description

We were not provided with title work or a current survey regarding the subject parcels. We have relied on the legal description as reported by the Brevard County Property Appraiser's website, the most recent copy of the deed.

Scope of Work

According to the Uniform Standards of Professional Appraisal Practice, it is the appraiser's responsibility to develop and report a scope of work that results in credible results that are appropriate for the appraisal problem and intended user. Therefore, the appraiser must identify and consider:

- the client and intended users of the report as well as the intended use;
- assignment conditions;
- typical client expectations; and
- typical appraisal work by peers for similar assignments.

SCOPE OF WORK	
Report Type:	This is an Appraisal Report as defined by Uniform Standards of Professional Appraisal Practice under Standards Rule 2-2(a). As such, it presents only summary discussions of the data, reasoning, and analyses that were used in the appraisal process to develop the opinion of value. Supporting documentation concerning the data, reasoning, and analyses is retained in our file.
Property Identification:	The subject has been identified by the assessors' parcel number, legal description, and address.
Inspection:	An inspection of the subject property has been made, with photographs.
Zoning:	A review of zoning and applicable land use controls has been made.
Market Area and Analysis of Market Conditions:	The subject marketing area and surrounding neighborhoods within the county were examined in order to determine factors that significantly affect the subject property. Local land use policies, community support facilities, traffic patterns, demographics, and development trends were considered. A summary of the most pertinent details is presented.
Highest and Best Use Analysis:	An 'As Vacant' and 'As Improved' H&BU analysis for the subject has been made. Physically possible, legally permissible and financially feasible uses were considered, and the most reasonably probable and maximally productive use was concluded.

SCOPE OF WORK	
Data Collection/Verification:	The appraiser maintains a comprehensive database for this market area and has reviewed the market for sales, rentals and listings relevant to this analysis. In addition, market data acquired in the course of previous appraisal work is retained in the appraiser's work files. Other sources include, but are not limited to the following: Multiple Listing Services, public records, interviews with brokers, buyers, and sellers, appraisal files, published articles and surveys. Information pertaining to this data was verified by one or more parties involved with, or having reliable knowledge of, each individual transaction when possible.
<u>Valuation Analyses</u>	
Cost Approach:	A cost approach was not applied as the subject is vacant land and this method does not accurately reflect market participant actions.
Sales Comparison Approach:	A sales comparison approach was applied as there is adequate data to develop a value estimate and this approach reflects market behavior for this property type.
Income Approach:	An income approach was applied as the subject is an income producing property and most market participants would rely on this approach.
Comments	The employed methods and level of analysis provides a credible value conclusion for the subject property.
Competency Comment:	The person(s) signing this report are licensed to appraise real property in the state the subject is located. They affirm they have the experience, knowledge, and education to value this type property. They have previously appraised similar real estate.

Location Maps

Neighborhood Map

Regional Map

Neighborhood Analysis

Area Location and Boundaries:

The subject is located in the City of Cocoa. The subject's market area is generally defined as a low-density mixed-use area that includes lands within the City of Cocoa and areas of unincorporated Brevard County. The market area is primarily industrial and residential. However, scattered commercial uses are located mainly along West King Street (SR 520), with a cluster of intense commercial uses near the I-95 interchange. The market area is best defined by the following boundaries: SR 528 to the north, Clearlake Road to the east, SR 520 to the south, and Interstate 95 to the west. The market area is approximately 60% developed.

Market Area and Property Characteristics:

Unlike many Florida communities with a high concentration of seniors, Cocoa's largest age group is in the 20-44 age range. Because of its central location in the County, it has developed a wide range of housing, commercial, industrial and institutional development over the years, including Eastern Florida State College and the University of Central Florida's Cocoa Campus.

The residential areas, particularly the area to the north of the subject, serve as a bedroom community for a large part of central and north Brevard County. The Kennedy Space Center and the Canaveral Air Force station are located approximately six miles east of the subject, as is another major economic generator, Port Canaveral.

Cocoa is relatively pro-growth in its policymaking, and in 2002, Cocoa embarked on an aggressive annexation program that nearly doubled the city's size to 14 sq. miles. Since 2002, the City has conducted 37 annexations totaling 3,075 acres in real property. Over 1,100 acres of industrial land was part of the annexation.

Commercial Development

Development at the SR 524 and I-95 intersection consists of two convenience stores with gasoline sales. The subject is positioned between the Flying J Travel Center and a large Walmart distribution center constructed between 2017 and 2018.

A more intense commercial node is located at the east end of S.R. 524 and along Clearlake Road. These properties include a typical array of local retail strip centers, independent retail stores, some offices, restaurants, and service businesses. Near the north end of Clearlake Road, there is a Wal-Mart Supercenter with over 200,000 square feet built-in 2004. The supercenter's construction spurred other nearby development, including a 14,000 SF retail strip center that contains a Little Caesars, Metro PCS, Hair Cuttery, and Dollar Tree. An Aldi grocery store also opened across from Walmart.

Approximately ½ mile to the west of the Super Walmart, at the SR 524 intersection and Industry Road, there are two shopping center properties. One is in active use, and the other is mostly unoccupied.

The active center is the Cocoa Commons Shopping Center, located on the south side of SR 524. It is a 75,120 SF shopping center anchored by a Publix grocery store. Other tenants include Anytime Fitness, GNC, and a variety of restaurants. Out-parcels of this center include a 7-11 convenience store, two branch banks, and a veterinary hospital.

The unoccupied center is the Shoppes of Cocoa North that is situated on the north side of SR 524. The center was originally anchored with a Winn Dixie grocery store and several local tenants. After the grocery store closed, the property was purchased by Home Depot Inc. in 2008 for the reported price of \$10.5 million. Then in 2010, news reports state that the company decided not to proceed with opening a store at this location. There are active out-parcels fronting SR 524 that include a CVS Pharmacy store and a McDonalds fast food restaurant.

The greatest concentration of commercial development in the defined area is along SR 520, within one mile of the SR 520 / I-95 interchange. This stretch of SR 520 has motels, restaurants, gasoline stations, and retail showroom-warehouse facilities. A Sam's Club discount retail super-store, with an area of over 134,000 SF, was completed in 2009 at the northeast quadrant of SR 520 and I-95 intersection. The Sam's Club is accessed via Townsend Road.

Erdman Automotive Group developed a new car dealership along the west side of Interstate 95 and north of State Road 520 in Cocoa. Erdman Toyota, Erdman Nissan, and Mike Erdman Pre-Owned are located on the new 35-acre site that includes a total of 160,000 square feet of buildings.

At the intersection of Cox Road and SR 520 there is a convenience store with gasoline sales on the northeast corner and a service/retail building for fencing near the northwest corner. Other uses near the subject include industrial, service retail, and mini-storage.

Industrial Development

Industrial use properties are predominantly between I-95 and Cox Road, with additional industrial properties along Burnett Road and West King Street. Most development consists of a mix of small to moderate scale service shops, mini-storage facilities and office/ warehouse facilities.

Several properties along Cox Road are typified as moderate-sized warehouse buildings with large fenced yards for use as equipment and/or materials storage. Most of the light industrial facilities along Cox Road appear to be occupied and in active use.

The Oleander Power Plant is one of the larger industrial properties in the defined area. This is an 800-megawatt plant located on a 37-acre site off of Townsend Road. It has five turbines that generate electricity, burning either natural gas or fuel oil.

In 2017, Port Canaveral commissioners approved the sale of land the port owned in Cocoa to Wal-Mart Stores East for \$5.75 million. Walmart's \$145 million "Perishable Distribution Center" officially opened in August of 2018. The distribution center is a 555,000-square-foot refrigerated warehouse on the 271-acre site near State Road 524 and Interstate 95 after the nearly \$100 million capital investment. Walmart also owns 125 acres east of the center, which it plans to develop at some point for additional light industrial/warehouse, commercial, and office uses.

New Multifamily Development

- Cocoa Grand is a 268-unit apartment complex under construction in Cocoa. The project is located on the south side of W. King Street (SR 520) and just east of Range Road. Trimback Construction, an Alabama-based contractor, is developing the project. The development is anticipated to cost \$50.9 million to complete and feature one-to-three bedroom units and offer amenities. As of March 2021, online marketing has not started, and few details on the project have been announced.
- Integra Preserve is a proposed 248-unit apartment complex located at the east end of SR 524 west of East Industry Road. The proposed project will be luxury apartments with enhanced public access to trails in the Cocoa Conservation Area that adjoins the project along the southern border. This project will be developed in one phase. The project amenities will include a clubhouse, pool and recreational areas, fitness center, and business center.

What makes this project stand out is the installation of electric car charging stations and trailhead access. According to the developer's recorded Development Plan, it provides a lighted public parking area with an informational kiosk at the trailhead.

- Quail Ridge is a proposed three-story, 40 unit proposed condominium project just south of SR 524 on Otterbein Avenue in Cocoa. Proposed unit sizes range between 971 square feet to 1,056 square feet with two bedrooms and two bathrooms. Since this project is still in the early phases of development, no marketing has started, few details have been released, and no timeline to complete has been established.

- Cirrus Apartments is a redevelopment site of the former Winn-Dixie retail center on the southwest corner of SR 524 and east industry Drive in Cocoa. The proposed project is two four-story buildings with 280 units. The project is expected to start construction in May of 2021, with the first units coming online in May 2022. The developer anticipates the project to be completed by November 2022 at an estimated cost of \$60 million

The units will be upper-end units, ranging between 521 square feet for studio apartments up to 11483 square feet for three-bedroom units. Although rental prices have not been determined, the developer anticipates mid-size units to rent for \$1,500 per month. Indoor garage parking will also be available to residents for an additional monthly charge. The developer is targeting that are in the space industry that wants to live close to work.

According to a recent article published by Florida Today on February 20, 2021, Cirrus will include the following:

- 20 studio apartments.
- 133 one-bedroom apartments.
- 108 two-bedroom apartments.
- 19 three-bedroom apartments.
- Two courtyards with a pool.
- A grilling area.
- Outdoor gathering areas.
- A four-story clubhouse.
- Major Tom's Lounge, a rooftop lounge/launch viewing area.
- A dog park, with separate sections for large and small dogs.
- A walking trail around a pond/wetland.

Source: Florida Today

A quick recap of the Brevard County Residential Report for March 2022:

- **Closed Sales are down -7.5%** for March 2022 in which the number of units closed was 1,091 compared to 1,179 in March 2021, with an **increase in cash sales of +9.3%**.
- **New Pending Sales are down -0.2%** and New Listings are up 9.6%.
- **The Median Sales Price for Brevard Single Family homes is up +22.9%** to \$350,000 compared to a year ago, which was \$284,900.

Access and Linkages

The subject market area is conveniently located with respect to traffic systems and transportation facilities. North/south highway access is provided by U.S. Highway One, Grissom Parkway, and Interstate 95.

Interstate 95 is an interstate highway that traverses the east coast of the United States from northern Maine to south Florida. This road is a major carrier of tourist, commuter and commercial traffic in the State of Florida. The interstate provides limited access at S.R.-524, S.R.-528, and at the Port St. John Interchange located approximately ½ mile± north of Camp Road. The approximate distance of the subject to the I-95 interchange is 0.20 miles.

SR 520 is a major arterial that crosses Merritt Island to the east and terminates in Cocoa Beach on the barrier island. West of the defined market area, SR 520 has an interchange at I-95 and then continues westward where allows access to the Beachline Expressway and eventually merges with SR 50, providing access to Orlando and central Florida. This street is also known as King Street.

SR 524 is a two-lane road that extends from Clearlake Road at its east end. Traveling westward, SR 524 has an interchange with I-95 and continues westward for another 1.5 miles to merge with SR 520.

Cox Road is a two-lane, north-south connector with several industrial users; it is moderately traveled. Within this context, the existing traffic facilities are considered adequate to support the subject's traffic and access demands. Overall, the subject is rated as Good for highway access and roadway linkages.

Commercial air transportation is provided by Orlando-Melbourne International Airport and by Orlando International Airport in neighboring Orange County. General aviation facilities are also available at Space Coast Regional Airport, located in Titusville.

Port Canaveral, Melbourne International Airport, and Space Coast Regional Airport all lie within Foreign Trade Zone 136, enabling qualified businesses to defer or eliminate U.S. Customs duties on imported goods.

A Project Development and Environment (PD&E) study is currently underway for S.R. 524 from Friday Road (south) to Industry Road in Cocoa. The study is evaluating the need to widen Clearlake Road from a two-lane roadway to a four-lane roadway. Possible improvements for bicycle and pedestrian safety throughout the corridor are being examined. Additionally, several potential highway and intersection improvements and a no-build alternative will be evaluated. This proposed project is in the beginning phases. Design, Right of Way, and Construction are not yet funded. The PD&E study is expected to be finalized in the Fall of 2022.

Traffic Count Map

The subject market area has good access with respect to traffic systems and transportation facilities. Traffic counts are not tracked on Camp Road, but along US Highway 1 in the area of the subject indicate 26,300 vehicles per day.

Demographics

For demographic data, we have included a community profile of the subject neighborhood provided by ESRI, the endorsed GIS firm utilized by both the Appraisal Institute and CCIM members. ESRI makes credible forecasts for 2021 and 2026. The 5, 10, and 15-minute drive time was considered appropriate in this case. Population and income information for the 5, 10, and 15-minute drive time areas are shown on the following tables.

March 29, 2022

Summary and Conclusion

The neighborhood is in the stable stage of development. No adverse neighborhood conditions are known, nor were any observed, that would preclude or severely limit subject utilization according to its highest and best use as determined herein. In comparison to other areas in the region, the market area is rated as follows:

MARKET AREA ATTRIBUTE RATINGS	
Highway Access	Good
Demand Generators	Average
Convenience to other supporting land uses	Good
Convenience to Public Transportation	Below Average
Employment Stability	Average
Police and Fire Protection	Average
General Appearance of Properties	Average
Appeal to Market	Average
Prices/Value Trend	Increasing for Residential Stable to Increasing for Industrial Increasing for Commercial

Zoning

Requirements noted below are not intended to represent all applicable aspects of the ordinance. They do provide the reader with knowledge of general legal parameters.

Zoning Summary	
Zoning Authority	County - Brevard, FL
Zoning District	Mobile Home Residential and Recreational Vehicle Park
Zoning Code	TR-1
Zoning Type/Description	Single-Family Mobile Home
Zoning Intent/Summary	The TR-1 and TR-1-A single-family mobile home zoning classifications encompass land devoted to single-family mobile homes.
Permitted Uses	Permitted uses include but are not limited to: Housing - Single Unit, Housing - Other, Recreation - Other, Park & Open Space
Future Land Use	The subject's Future Land Use is Neighborhood Commercial for the portion of land that fronts US Highway 1, approximately 3 acres, and RES 8 for the remaining 5-acre back portion, which allows 8 units per acre.
Minimum Lot Area	7,500 sq ft; Minimum Living Area: 600 sq ft
Maximum Building Coverage	0.5
Minimum Lot Width	100 Feet
Minimum Lot Depth	200Feet
Front Set Back Distance	25 ft
Side Yard Distance	7.5 ft; On a corner lot, the side street setback shall be not less than 15 ft, including accessory buildings. If a corner lot is contiguous to a key lot, then the side street setback shall be not less than 25 ft, including accessory buildings.
Back Yard Distance	20 ft
Maximum Building Height	35 ft
Zoning Parking Requirements	Duplexes: Two parking spaces are required per residential unit; a garage space may count as one parking space; Single-family residence: Two spaces per unit. The subject meets the requirement for parking.
Deed Restrictions/Moratoriums	To our knowledge, there are no land use regulations other than zoning that would affect the property. Further, there is no moratorium on development.
Entitlements	We were provided no information by ownership that the subject site possesses any Entitlements which would affect the subject site. We assume that the subject does not have Entitlements in place which would significantly affect the value.

Assessment and Taxes

REAL ESTATE ASSESSMENT AND TAXES					
Taxing Authority		Brevard County Property Appraiser's Office			
Assessment Year		2021			
ASSESSED VALUES					
Real Estate Assessment and Taxes					
Tax ID	Total Assessment	Millage Tax Rate	Ad Valorem Taxes	Non Ad Valorem Taxes	Total Parcel Taxes
23-36-30-00-502	\$314,000.00	13.4169	\$3,712.99	\$5,460.29	\$9,173.28
Assessment Comments: The tax year runs from January 1st to December 31st. Real estate taxes in Brevard County are paid one year in arrears (2021 taxes are paid in 2022), and are due and payable November 1st of each year or as soon thereafter as the certified tax roll is received by the Tax Collector from the Property Appraiser. Properties in Brevard County are assessed Ad Valorem Taxes and Non-Ad Valorem Taxes. Ad valorem taxes, or real property taxes, are based on the value of such property. Non-ad valorem assessments are NOT based on value but are set amounts. The Non-Ad Valorem Taxes the subject is responsible for goes toward solid waste disposal and emergency medical services. According to Florida law, assessments are to be at ‘Full Just Value’. This term is generally held to be 100% Market Value, less reasonable costs of sales. It has been our experience, however, that assessments vary widely in relation to market value as defined in this report. Reassessments are annual based on a calendar year.					
Delinquent Taxes: According to the Brevard County Tax Collector, as of the date of the report, there are no delinquent real estate taxes.					

If the property were to be sold at near the market value concluded in this report, \$1,050,000, the assessed value and the taxed would increase. Typically, properties in Brevard County are assessed at approximately 75% of the market value. This would equate to an assessed value of \$787,500. The resulting taxes, using the current millage rate and Non-Ad Valorem taxes would then be \$16,026.29. This amount will be utilized in the Income Approach.

Property Description

The following description is based on our property inspection, public records, and the information provided by the property's ownership.

Site Summary	
Parcel ID	The subject site consists of 8.25 Acres of Land Zoned for mobile home use in Cocoa, FL. The property has the presence of two areas of wetlands totaling 1.56 Acres on the northern portion of the parcel. There are currently 22 Mobile Home Spaces and 3 RV spaces on the
Location	The subject has assigned physical addresses of 308-372 Camp Road and 4801-4841 N. Highway 1 in Cocoa, FL.
Land Use	Vacant Mobile Home/Residential Land.
Current Use	The subject currently has 22 mobile home spaces and 3 RV spaces.
Proposed Use	
Highest and Best Use Site as Vacant	The highest and best use, as vacant, is for mobile home use.
Traffic Count (Most Recent)	Not tracked along Camp Road; 26,300 Highway 1
Map Latitude	28.446857
Map Longitude	-80.767006

Site Size Attributes	
Gross Land Area (Sq Ft)	359,370
Gross Land Area (Acres)	8.25
Usable Land Area (Sq Ft)	291,416
Usable Land Area (Acres)	6.69
Excess Land Area Comments	There is no indicated excess land. The mobile home use requires some greenspace.
Usable Land Area Comments	Besides the setback ordinances required by zoning and approximately 1.56 acres of wetlands and ponds, we have been provided no information that the subject land is unusable.
Source for Site Size	Property appraiser record card.
Site Size Analysis	The total subject land area is typical for a mobile home use in the subject neighborhood.

Highest and Best Use

Before an opinion of value can be developed, the highest and best use of the property must be determined for both the subject site as though vacant, and for the property as improved. Highest and best use may be defined as

“the reasonably probable and legal use of vacant land or improved property, which is physically possible, appropriately supported, financially feasible, and that results in the highest value ¹.”

1. **Permissible Use.** What uses are permitted by zoning and other legal restrictions?
2. **Possible Use.** To what use is the site physically adaptable?
3. **Feasible Use.** Which possible and permissible use will produce any net return to the owner of the site?
4. **Maximally Productive.** Among the feasible uses which use will produce the highest net return, (i.e., the highest present worth)?

Because the use of the land can be limited by the presence of improvements, highest and best use is determined separately for the land or site as though vacant and available to be put to its highest and best use, and for the property as improved.

The first determination reflects the fact that land value is derived from potential land use. The highest and best use of a property as improved refers to the optimal use that could be made of the property including all proposed structures.

The determination of the highest and best use of land as though vacant is useful for land or site valuation; determining the highest and best use of an improved property provides a decision regarding continued use or demolition of the property.

Highest and Best Use As Vacant

The category of Legally Permissible uses includes an analysis of public development regulations, including current and possible future changes in zoning regulations and procedures, and private constraints including deed restrictions, leases, or any known encumbrances on title.

As discussed earlier in the zoning section, the current zoning classification is “TR-1.” Mobile Home Residential and Recreational Vehicle Park. The TR-1 and TR-1-A single-family mobile home zoning classifications encompass land devoted to single-family mobile homes.

To our knowledge, there are no land use regulations other than zoning that would affect the property. Further, there is no moratorium on development.

¹ *The Appraisal of Real Estate* 14th Edition, Page 333, Appraisal Institute

Physically Possible

The category of Physically Possible uses is an analysis of the subject's ability to support various improvement types. Included in this category is an analysis of the physical attributes of the land, access and transportation, infrastructure and available public services, environmental considerations, along with current and expected future neighborhood development trends.

The total site area is 8.25 acres or approximately 359,370 square feet. The site is rectangular and is situated at the northwest corner of Camp Road and US Highway 1, with access from both roads.

The site has adequate access to utilities to site, each lot has a septic system. Under current zoning just residential uses are allowed. The future land use is Neighborhood Commercial for the front three acres along US Highway 1. It would most likely appeal to a service use that could comply with zoning, but did not require significant passing traffic would be most probable.

Financially Feasible

Financial Feasibility is an analysis of the ability of the property to return the highest possible yield to the investment of land and improvements based on its income producing capability and the return requirements of investors in the market. There are few mobile home parks in the area, and the subject is 100% occupied. There is sufficient demand for this property type.

Maximally Productive Use

Reviewing the permitted principal uses set forth under the zoning ordinance, as well as recent developments in the neighborhood, it is our opinion that residential development is the most feasible use of the land.

Reviewing the permitted principal uses set forth under the zoning ordinance it is our opinion that residential development is the most feasible use of the land, if vacant.

Highest and Best Use As Improved

We must also address the Highest and Best Use of the property considering the existing improvements, to determine if the existing improvements should be modified in some way to become more productive, or replaced in favor of more appropriate improvements.

Ownership has provided income and expense information related to the current use. To determine the value of the property as improved we utilized an Income Approach analysis and supported with the Sales Comparison Approach. The value indication is \$1,000,000 as a mobile home park. This equates to \$121,212 per acre. The front portion of the site has a future land use of Neighborhood Commercial.

It is clearly evident the subject, as improved, represents a higher value than as vacant land. We present several sales demonstrating this conclusion; the following recent sales in the area are illustrated below and on the following pages.

Sale Comments

This comparable is 3.17 acre parcel of vacant, Industrial zoned land located along the north-west side of Highland Drive and Plaza Parkway. The site is atypical in shape and heavily vegetated. Access is along Plaza Parkway and N Cocoa Blvd and SR 520 are nearby. There is +/- 1.34 acres of wetlands along the south end of the site, leaving approximately 1.83-acres of buildable acres. The FEC Railway runs adjacent to the site on the eastside.

Sale Comments

This is the sale of 1.19 acres of Industrial Land at the corner of Tri-City Ave and Grissom Pkwy in Cocoa just north of 528. Access via SR 528 appears to be approx. 0.6 miles away and approx. 4 miles (5 min) to I-95 access to the east. Site has approx. 0.31 acres wetlands to the northwest corner of property.

Sale closed in March 2021 for \$163,400. It was not listed in the MLS. Richard Straughn was the seller.

This is the highest price per acre, however, it is a smaller site and has wetlands, reducing the useable acreage.

Sale Comments			

This is the sale of vacant land consisting of three separate parcels combined consisting of 4.4 acres. This site had been originally earmarked as a possible ACLF and the property has a preliminary site layout on file with this office for an Assisted Living Facility according to Co-Star Listing.

The property was originally listed for \$499,900 but after 492 DOM, sold for \$437,500 to Andrew Procell on 8/23/2021.

In speaking with the listing agent, the property sold at Arms Length to a local Air Conditioning Business. Property will be owner-user.

Michael Dreyer was involved with the listing. (321) 508-6422

Sale Comments

This is a tract of vacant land located along the east side of US Highway 1, just south of Camp Road in an unincorporated area north of Cocoa. The property has a rectangular shape with approximately 567 feet of frontage along the east side of US Highway 1. Average parcel depth is approximately 209 feet. The northern 1/3 part of the parcel is at or near street grade, but the land drops to about 3 feet below street grade for the rest of the parcel. The land has a dense cover of trees and scrub brush. The north part of the parcel has BU-1 zoning with Community Commercial future land use. The remainder of the parcel has RU-2-10 (multi-family residential) zoning with Neighborhood Commercial future land use. City water is available, but an on-site septic system will be needed for waste water disposal.

Sale Comments

This is the sale of 2.55 Acres of Vacant land with road frontage on Highway 1 in Grant-Valkayria. The parcel consists of two properties with 350 feet of total road frontage along with 210 feet of direct water frontage/beach on the Indian River.

The property was listed and sold for \$250,000 on July 22, 2021 with Seller Financing of \$125,000 per Clerk of Courts.

Per Mandy and Grant-Valkayria Zoning and Planning, the property is zoned BU1A for Restricted Neighborhood Retail Commercial.

Through verification with Pat, Listing Agent, she confirmed Owner-Financing and stated there was nothing atypical about the sale. Pat states that the intended use is to develop the property for residential use.

The sales range from \$78,985 per acre to \$185,682 with an average of \$109,742 per acre. The concluded value of the subject, as a mobile home park, is \$1,050,000 which equates to \$127,273 per acre. This is greater than the average price per acre of the vacant land comparables, indicating that the highest and best use is for continued use as a mobile home park.

No other physically possible and legally permissible use of the improvements is considered to be more maximally productive. Therefore, the continued Mobile Home Park use of the subject site is considered to represent the “highest and best use as improved.” Regarding the reported operations of the facility, occupancy appears high, with mobile homes predominantly operated on the home pad sites, with 3 RV sites. While the majority of the market leases lots only, ownership has decided to maintain and lease the homes on-site. Market participant interviews indicate that when also providing mobile homes in the rental rate, it typically allows for greater income potential per spot, but increases management and Repairs and Maintenance charges.

Exposure Time

Exposure time is the estimated length of time that the subject would have been offered on the market prior to a hypothetical sale of the property on the effective date of the appraisal. Based on data obtained from sales transactions and interviews with market participants, it is our opinion that the probable exposure time for the property at the concluded market value is 4-6 Months for the effective date of April 7, 2022.

Marketing Period

Marketing period is an opinion of the amount of time it might take to sell the subject at the concluded market value during the period immediately following the effective date of the appraisal. Because we foresee no significant changes in market conditions in the near term, it is our opinion that a reasonable marketing period for the subject is the same as its exposure time. Therefore, we estimate the subject's marketing period to be 4-6 Months for the effective date of April 7, 2022.

Market Analysis

Current Listing Activity of Mobile Home Facilities-State of Florida

Following is a list of the current competing supply for this property type available and listed for sale. We conducted a search in CoStar.com, a recognized commercial real estate data base, of properties in central Florida offering similar features to the subject. Due to the lack of properties in Brevard County and the neighboring counties, the search area was widened.

Listing Summary

Listing Data				
Listing	Price	Units	Notes	\$/Unit
1	\$7,000,000	117	11.74 acres, 84 MH lots, 18 RV lots, 14-unit motel, restaurant, 422 DOM	\$59,829
2	\$5,800,000	55	Located in Titusville, 5.77 acres, 55+ community, 98 DOM	\$105,455
3	\$4,500,000	67	4.39 acres, lakefront, 187 DOM	\$67,164
4	\$2,500,000	23	4.66 acres, Orlando, 113 DOM	\$108,696
Min.				\$59,829
Max				\$108,696
Average				\$85,286
Median				\$86,309

The listings range from \$59,829 per unit up to \$108,696 per unit with an average of \$85,286 per unit. During our interviews, several listing agents reported that the market pricing for this property type has become aggressive, and eventual sale prices often were well below initial list prices.

However, the most important take away from this list is the divergence of Capitalization Rates as it relates to risk. Properties with strong historical income and operating statements, and with lower management expectations garner to most aggressive (lowest) capitalization rates. Projects with higher risk, whether due to vacancy, more park owned homes, or other factor, can sizeable increase the appropriate capitalization rate.

The subject has a risk factor to potential buyers in the marketplace, the high number of park owned homes and their management/maintenance costs.

Valuation Methodology

Cost Approach

The Cost Approach is summarized as follows:

$$\begin{array}{r} \text{Cost New} \\ - \text{Depreciation} \\ + \text{Land Value} \\ = \text{Value} \end{array}$$

Income Approach

The Income Approach converts the anticipated flow of future benefits (income) to a present value estimate through a capitalization and or a discounting process.

Sales Comparison Approach

The Sales Comparison Approach compares sales of similar properties with the subject property. Each comparable sale is adjusted for its inferior or superior characteristics. The values derived from the adjusted comparable sales form a range of value for the subject. By process of correlation and analysis, a final indicated value is derived.

Final Reconciliation

The appraisal process concludes with the Final Reconciliation of the values derived from the approaches applied for a single estimate of market value. Different properties require different means of analysis and lend themselves to one approach over the others.

Analyses Applied

A **cost analysis** was considered and was not applied as the subject is vacant land and this method does not accurately reflect market participant actions.

A **sales comparison analysis** was considered and was developed as there is adequate data to develop a value estimate and this approach reflects market behavior for this property type.

An **income analysis** was considered and was developed because the subject is an income producing property and most market participants would rely on this approach.

Income Approach

The Income Approach to value is based on the present worth of the future rights to income. This type of analysis considers the property from an investor's point of view, the basic premise being that the amount and quality of the income stream are the basis for value of the property. In a Leasehold Valuation, this approach carries significant weight because the Income Stream can be partitioned between income attributed to the land and the improvements.

Direct Capitalization Analysis

The steps involved in capitalizing the subject's net operating income are as follows:

- Develop the subject's Potential Gross Income (PGI) through analysis of the subject's actual historic income and an analysis of competitive current market income rates.
- Estimate and deduct vacancy and collection losses to develop the Effective Gross Income (EGI).
- Develop and subtract operating expenses to derive the Net Operating Income (NOI).
- Develop the appropriate capitalization rate (R_o).
- Divide the net operating income by the capitalization rate for an estimate of value through the income approach.

Potential Gross Income (PGI)

The Subject

According to information provided by ownership, there are 22 Mobile Home lots and 3 RV lots. Of the 22 Mobile Home lots, one is the office and owner's home, and four lots are leased as *lots only* for \$300 to \$350 per month. The remaining lots have mobile homes that are rented. These rents are approximately \$595 to \$975 per month.

The first step in the Income Approach is to estimate the market rent. The market rent is that rent the subject might reasonably be expected to command when exposed to the rental market.

Rentals of mobile home lots from competitive mobile home parks were compared to the subject in order to help estimate the market rent. The mobile home projects selected present a general cross section of parks, in terms of age/condition, overall appeal, locational factors, amenities offered and services supplied. All of the rental comparables are older parks with mostly singlewide and doublewide mobile homes and some RV lots. The following comparable rentals are considered to be indicative of the local rental market.

RENTAL ONE

Project Name: Maplewood Village Mobile Home Park
Address: 201 Cape Avenue, Cocoa FL 32926
Project Size: 205 Mobile Home Lots
Occupancy: 95%
Rent: \$460 – Lot Only
Amenities: Heated Pool, Shuffle Board and Bocce Courts, Billiard/Game Room
Services Supplied: Trash Collection
Verification: Management, 321-636-6061, by Jason Malick, TAW Trainee Appraiser

Description:

This rental is located in a 205 lot Mobile Home Park in Cocoa. The Mobile Home Park is a 50-and-over community. The park does not own any of the mobile homes and leases the land; additionally, there are no recreational vehicle spaces. The lots rent for \$460 per month and includes trash collection only; the homeowners are responsible for their own utilities and maintenance of their own yards and homes. The park has several amenities that are included with the lot fee including multiple game courts, a game room, and a heated pool/patio.

RENTAL TWO

Project Name: Cocoa Estates Mobile Home & RV Park
Address: 914 Clearlake Road, Cocoa, FL 32922
Project Size: 75 Mobile Home and RV Lots
Occupancy: 90%
Rent: \$425-\$475 – Lot Only
Amenities: None
Services Supplied: Water Hookups
Verification: Bill, Park Manager 321-482-2245, by Jason Malick, TAW Trainee Appraiser

Description:

This rental is located in a mobile home and RV park with 75 total lots. There are no age restrictions within the community. The lots rent for \$425-\$475 per month. Most of the mobile homes are older and there are no property amenities. Each lot has full hook ups and is metered for water and power (50 amp service available). Water is billed back to the residents of the park and homeowners are responsible for initiating their own electric and cable.

RENTAL THREE

Project Name: Cypress Strand Mobile Home Park
Address: 3305 Frankie Lane, Cocoa, FL 32926
Project Size: 97 Mobile Home and RV Lots
Occupancy: 98%
Rent: \$350-\$650 – Lot Only
Amenities: Swimming Pool
Services Supplied: Trash Pickup and Water
Verification: Community Manager 321-638-4121, by Jason Malick, TAW Trainee Appraiser

Description:

This rental is located in a 97 lot, all ages community. The lot rents range from \$350-\$650 and there are no RV spaces. The rent includes water and trash collection. Most of the mobile homes are older and the park has a community swimming pool. The streets in the community are paved and narrow and parking is off-street.

RENTAL FOUR

Project Name: Sun Lake Village Estates
Address: 4865 Lake Ontario Drive, Cocoa, FL 32926
Project Size: 190 Mobile Home Lots
Occupancy: 85%
Rent: \$375-\$700 – Lot Only
Amenities: None: Located across the street from a neighborhood park/playground
Services Supplied: Trash Pickup and Water
Verification: Community Manager 321-639-0370, by Jason Malick, TAW Trainee Appraiser

Description:

This rental is located in a 190 lot, all ages community. The lot rents range from \$375-\$700 and there are no RV spaces. The rent includes water and trash collection. Most of the mobile homes are older but the park also offers pre-owned homes for sale and/or “rent to own”. The park does not have any amenities but is located across the street from the Space Coast Communities Sports Complex that has a park and playground.

RENTAL FIVE

Project Name: Missile View Mobile Home Park
Address: 2135 Mayfair Way, Titusville, FL 32796
Project Size: 115 Manufactured Home Lots
Occupancy: 95%
Rent: \$365-\$450– Lot Only
Amenities: Shuffle Board Courts, Laundry Facility, and Community Room
Services Supplied: Trash Pickup and Water
Verification: Park Manager 321-225-8176, by Jason Malick, TAW Trainee Appraiser

Description:

This rental is located in a 115 lot, 49 and over age community. The lot rents range from \$365-\$450 and there are no RV spaces. The rent includes water and trash collection. The Mobile Home Park has been operated for more than 40 years. Park amenities include a shuffle board court, community room with host activities and gatherings, and laundry facilities.

RENTAL SIX

Project Name: Sonrise Palms RV Park
Address: 660 Tucker Lane, Cocoa, FL 32926
Project Size: 96 Mobile Home, RV, and Cabin Lots
Occupancy: 80%
Rent: \$773-\$1,500– Lot, Cabin or Mobile Home Rental
Amenities: Bathhouse, Laundry, Heated Pool, and Community Fire Pit
Services Supplied: Trash Pickup
Verification: Park Manager 321-633-4335, by Jason Malick, TAW Trainee Appraiser

Description:

This rental is located in a 96 lot park with no age restrictions. The property has RV Spaces that rent for \$773 per month; additionally, the property rents out cabins for \$875 per month 1 Bedroom Mobile Homes that include linens and furnishings that rent from \$1,175-\$1,500 per month. The park has community amenities including a bathhouse, laundry facilities, a heated pool, and community fire pit. The park also has nightly, weekly, and yearly rental options.

Estimate of Market Rent and Potential Gross Income

A summary of the market rents for mobile home lots provided by the proceeding rental comparables are as follows

<u>RENTAL</u>	<u>RENTAL RATE</u>	<u>COMPARABILITY</u>
One	\$460 lot	Superior
Two	\$425-\$475 lot	Similar
Three	\$350-\$650	Superior
Four	\$375-\$700	Similar
Five	\$365-\$450 lot	Similar
Six	\$773-\$1500	Superior

The above information indicates a market range from \$350 to \$475 for a lot and \$650 to \$1,500 for a home. Rentals 1, 3, and 6 are superior to the subject in amenities. The subject rental rates, at \$300 to \$350 per month for a lot appear to be reasonable based on the location and overall condition and amenities of the park. These will be utilized in our analysis. The subject home rents range from \$595 to \$975 per month. The rents include water/sewer, common area maintenance and trash removal. Tenants pay for their electric, telephone and cable TV. The subject's actual contract rent appears reasonable and will be utilized in this analysis.

Historic Income

The owners provided the income for 202 and 2021.

Income Summary				
Unit/Space Type	Appr 2021		2020	
	Amount	\$/Unit	Amount	\$/Unit
	\$147,660	\$0	\$168,097	\$0
Total Rental Income	\$147,660	\$5,906	\$168,097	\$6,724

The reported income for the month of February 2022 is \$11,655. There are two lots with homes on them that are in poor condition, not suitable for occupancy. There are also two vacant RV lots. The mobile home that functions as an office does not produce any rent. The following rent roll illustrates a market rent of \$350 applied to the lots and the RV lots, and a market rent of \$750 applied to the park-owned homes. A rent of \$1,200 is applied to the manager home/office. The resulting income is \$185,400.

Potential Gross Income (PGI)

Using the *market rents*, the potential gross income is \$185,400. This includes rent for the former owner home.

Vacancy and Collection Loss

Occupancy of the comparable mobile home parks in the general market area range from 85% to 100%. The subject is a stabilized property with professional management that has been in operation for several years. The subject's reported occupancy is just 2 vacant RV lots, which equates to 92%. There are times of vacancy when someone moves, and stops renting the home. We have forecasted market rents for the total income, which may result in some vacancies. We estimate vacancy and collection losses at 15.00% of Potential Gross Income. This equates to \$27,810 and a resulting Effective Gross Income projection of \$157,590. This is between the 2020 and 2021 reported income, and a reasonable forecast for the subject on a stabilized basis.

Expenses

We were provided with actual historical expenses for the subject, shown in the table below. The management/payroll expense is high when compared with similar properties. There was no line item for this expense in 2020, likely because the owner, who has since passed away, managed the property. In 2020, the legal and professional fees were high, and in both years the repairs and maintenance supplies is a significant expense. In 2020, the expenses actually exceed the income.

Expense Summary						
Expense	2021			2020		
	Amount	\$/Unit	% EGI	Amount	\$/Unit	% EGI
Tax Expense	\$13,539	\$542	0.0%	\$13,936	\$557	8.3%

Total Expenses	\$167,995	\$6,720	0.0%	\$117,299	\$4,692	69.8%
Net Operating Income	-\$20,335	\$0	0.0%	\$50,798	\$0	30.2%

The subject expenses on a per unit basis were \$4,692 in 2020 and \$6,790 in 2021. In addition to the above expenses, charity and car expenses were included, which are not included in our analysis.

There are several comparable expenses from other mobile home parks, shown on the following pages.

Expense Comparable

The following expenses are the 2020 expenses from a 109-lot mobile home park in Titusville, with river frontage, and no park-owned homes. Nothing was reported for administrative, advertising, miscellaneous or reserves.

Expense Summary		
2020		
Expense	Amount	\$/Unit
Real Estate Tax Expense	\$54,000	\$495
Building Insurance	\$7,800	\$72
Payroll/Management	\$30,000	\$275

Totals	\$175,513	\$1,809	\$180,442	\$1,860	\$145,723	\$1,502

The following expense is from an RV Park with 4.53 acres of land, not waterfront. The property has 67 lots designated for the RVs. The facility has a 1,040 square foot rental office building constructed in 1954. The facility has a high occupancy with many clients returning year after year for seasonal visits and over 100 persons on the waiting list.

We were provided with actual historical expenses for the property, shown in the table below.

Expense Summary									
Expense	Budget			Months to Annualize:				2021	
	Amount	\$/SF	\$/Unit	YTD	Annualized	\$/SF	\$/Unit	Amount	\$/Unit
Tax Expense	\$9,000	\$4.93	\$134	\$0	\$9,000	\$4.93	\$134	\$8,619	\$129

Professional and Administrative Services	\$20,000	\$10.96	\$299	\$1,429	\$5,716	\$3.13	\$85	\$6,876	\$103
Total Expenses	\$137,030	\$75.13	\$2,045	\$33,936	\$149,744	\$82.10	\$2,235	\$111,632	\$1,666

The subject expenses on a per unit basis were \$4,692 in 2020 and \$6,790 in 2021. The three comparable expenses are \$2,328, \$1,809 and \$2,235 respectively. The subject would have higher expenses as some of the homes are park owned, increasing the repairs and maintenance costs. However, some of the subject expense categories are greater than the comparables overall.

Expenses Analysis and Projection

Typical expenses incurred in operating similar projects include real estate taxes, insurance premiums, utilities, repairs and maintenance, management, payroll/salaries, and miscellaneous legal/audit expenses. The following table illustrates our estimated expenses for the operation of the subject property.

Expense	Amount	Method	Annual	\$/Unit
Tax Expense	\$16,026	\$/Year	\$16,026	\$641
Insurance	\$13,000	\$/Year	\$13,000	\$520
Management	10%	% of EGI	\$15,759	\$630
Total Utilities	\$6,500	\$/Year	\$6,500	\$260
Repairs and Maintenance Supplies	\$20,000	\$/Year	\$20,000	\$800
Repairs and Maintenance Trades and Labor	\$10,000	\$/Year	\$10,000	\$400
Legal and Professional Fees	\$2,000	\$/Year	\$2,000	\$80
Other Expenses	\$1,000	\$/Year	\$1,000	\$40
Reserves	1%	% of EGI	\$1,576	\$63
Total Expenses:			\$85,861	\$3,434
Expense Ratio (Expenses/EGI):			54.48%	
Net Operating Income (NOI):			\$71,729	\$2,869

Real Estate Taxes

Real estate taxes are from an earlier section of the report and are estimated at annually \$16,026. This amount includes estimated ad valorem and non-ad valorem charges and allows for a potential increase upon the sale of the property.

Insurance Expense

The actual insurance expense was reported at \$12,000 for 2021. We include an allowance of \$13,000 to account for rising costs in this category.

Utilities

In the case of the subject, utilities provided include common area utilities, water and utilities related to the RV lots. The renters of the mobile homes pay their own electricity and each lot has a septic system. The income and expense information provided reflects utility expenses from \$168 to \$234 per lot annually. This charge covers municipal water service and common electric. An allowance of \$260 per lot, or \$6,500 is included to account for rising costs in this category.

Repairs & Maintenance/Trades and Labor

Repair and maintenance expenses typically allow for the labor and materials necessary to maintain common area landscaping, maintenance facilities, the park-owned homes, and equipment. The actual repairs and maintenance expense provided by ownership was reported at \$34,647 in 2020 and in 2021 increased to \$38,546 for the maintenance supplies and an additional \$38,737 for trades and labor. The comparable expenses had costs for this category as \$1,174 , \$927 and \$299 per lot, respectively. We forecast a stabilized expense at \$20,000 for the supplies and \$10,000 for the labor. This equates to \$30,000 or \$1,200 per lot.

Management/Payroll

Large facilities such as the subject typically require professional management to maintain occupancy and control operating expenses. This category includes the on-site manager's salary and payroll expense, office personnel, maintenance employee, benefits and bonuses. Projects we have reviewed reflect payroll and benefits typically fall in a range of \$200 to \$400 per lot. An allowance of 10% of FGI, or \$14,883 is included for management costs, which equates to \$595 per lot. The subject did not have a management expense in 2020 and in 2021 it was \$55,000. The subject includes a manager's or owner's home, the income of which is not included in our allowance, as this is a benefit and would keep the payroll costs down.

Legal and Professional

This category includes some office-related expenses. The historic amounts are \$42,959 in 2020 and \$1,659 in 2021. The 2020 expense likely includes one-time only expenditures. An allowance of \$2,000 is included for this expense.

Miscellaneous/Other Expenses

This category includes any additional expenses not already discussed. An allowance of \$1,000 per year is included.

Reserves

For this property type, a Reserve for Replacement is included, account for repairs of the site improvements and capital expenditures items like appliances in the park-owned homes. We estimate 1% of EGI is deemed reasonable and appropriate for the subject.

Compiled by: Tuttle-Armfield-Wagner Appraisal & Research, Inc.

Total Operating Expenses

Total operating expenses are estimated to be \$85,861 or \$3,434 per lot. The expense ratio is 54.48%. The expense comparables had expenses per lot from \$1,809 up to \$2,328. Costs have increased over the past year, and the subject has more park-owned homes, which also increases expenses.

Cash Flow	Potential Gross Income	Effective Gross	Expenses	Exp. Reimbursements	NOI
Amount	\$185,400	\$157,590	\$85,861	\$0	\$71,729

Net Operating Income in the first forecast year is estimated at \$71,729.

Capitalization Rate

The Overall Capitalization Rate is a ratio which expresses a relationship between the net income a property produces (is capable of producing) and value. In our search of the Brevard County market, there are no recent transactions of similar buildings in which to extract a credible overall rate. This property type is overwhelmingly purchased by owner-occupants.

There are various methods of deriving an overall rate. The two preferred methods are the (1) direct capitalization, which is where the rate is derived directly from the market and (2) the band of investment, which is a technique where the capitalization rates attributable to components of a capital investment are weighted and combined to derive a weighted-average rate attributable to the total investment.

Direct Capitalization Market Extraction

In this method, the overall rate is based on market transactions of income producing properties. The overall rate from an individual sale is derived by dividing the net income by the purchase price. Since each property is unique, it follows that each sale will reflect special characteristics based on many factors including financing, income ratios, age and condition, as well as quality and durability of the income stream.

The previously-cited listings did not have reported cap rates. The following report is from CoStar and details mobile home cap rates for listings and properties under contract throughout Florida. The cap rates range from 4.20% up to 11.30% with an average of 7.32%.

Band of Investment Method

This method is a technique in which the capitalization rates attributable to components of a capital investment are weighted and combined to derive a weighted-average rate attributable to the total investment.

Because most properties are purchased with debt and equity capital, the overall capitalization rate must satisfy the market return requirements of both investment positions. Lenders must anticipate receiving a competitive interest rate commensurate with the perceived risk of the investment or they will not make funds available. Lenders generally require that the loan principal be repaid through periodic amortization payments. Similarly, equity investors must anticipate receiving a competitive equity cash return commensurate with the perceived risk, or they will invest their funds elsewhere.

Typical mortgage terms and conditions may be obtained by surveying lenders active in the market area. Equity capitalization rates are derived from comparable sales by dividing the annual equity dividend of each sale by the equity investment. The equity capitalization rate used to capitalize the subject property's equity dividend ultimately depends on the appraiser's judgment as to how individual investors perceive the relationship between market value and investment value, especially in a market with fluctuating mortgage interest rates. When the mortgage and equity capitalization rates are known, an overall rate may be derived with the band-of-investment, or weighted-average, technique¹ using the following formulas:

$$\begin{array}{rcl} \text{Mortgage component} & & M \times RM. \\ \text{Equity component} & + & E \times RE \\ & & Ro \end{array}$$

Financing

The investigation of possible commercial mortgage terms with local and regional institutional lenders shows that there is a rather wide range of possible terms with interest rates ranging from 4% to 5%. The terms generally range from ten (10) to twenty-five (25) years with renewal or renegotiations at 3 to 5 years. Rates for solid borrowers would be expected to stabilize in the 5.0% range with a 70% loan-to-value ratio and a twenty (20) year term. We will utilize the above terms.

Equity Dividend Rate

Equity dividend requirements are best estimated by viewing known yields to equity from similar on other investments. A rate of 5.0% is applicable in the current market.

Capitalization Rate Calculations				
Capitalization Rate Variables				
Mortgage Interest Rate	5.00%			
Loan Term (Years)	20			
Loan To Value Ratio	70.0%			
Equity Dividend Rate	5.00%			
Band of Investment Analysis				
Mortgage Constant		Loan Ratio	Contributions	
0.079194689	x	70.0%	=	5.54%
Equity Dividend Rate		Equity Ratio		
5.00%	x	30.0%	=	1.50%
Band of Investment Capitalization Rate				7.04%

The Band of Investment technique indicated a capitalization rate 7.00% (rd.).

RealtyRates.com is also considered an authoritative resource for tracking national overall capitalization rates on commercial property. Realty Rates is widely recognized as an authoritative source for capitalization and discount rates, cash flow assumptions, and actual criteria of active investors, as well as property market information. Each quarterly issue of the Survey contains current, prior-quarter, and year-ago rates, cash flow assumptions, and other criteria used to analyze real estate investments. The most recent investor surveys for capitalization rates for mobile home parks and manufactured housing are summarized below. The average rate is 9.00% with a minimum of 5.18% and a maximum of 13.06%.

INVESTOR SURVEY AS OF 1st Quarter 2022			
Type	Minimum	Average	Maximum
Overall Capitalization Rates From Survey			
Mobile Home Parks	5.18%	9.00%	13.06%
Source: RealtyRates.com			

Peer Group Analysis-Overall Cap Rate

We have also had discussions with Mr. Dave Reynolds, President of Mobile Home University, a real estate broker who specializes in mobile home park sales and is very knowledgeable of the market. Mr. Reynolds reports, “good properties in top markets are selling as low as 4-6% caps. Secondary markets are seeing 6-8% caps on average.”

Mobile Home Capitalization Rate Market Research

Manufactured housing has gone from a niche asset class to a sector that is in the spotlight thanks to its proven ability to deliver stable cash-flows with rent collections that remained consistent even during the pandemic. According to NorthMarq's latest research report, Fourth Quarter 2021, occupancies at manufactured housing communities held fairly steady at 94% with annual rent growth at a healthy 4.4%.

The national manufactured housing market continued to improve in the fourth quarter. Occupancy rates rose and rents advanced. Demand is elevated and shipments of new units accelerated. The investment market gained momentum with more properties trading and prices pushing higher.

Occupancy rose for the sixth consecutive quarter, inching up 10 basis points to 94 percent. The rate advanced 60 basis points in 2021, offsetting a modest decline in the preceding year.

Rents rose 4.4 percent in 2021, outpacing a gain of 3.8 percent one year earlier. Rents ended the year at \$593 per month. All regions in the country recorded rent increases for the year, with the strongest gains recorded in the West and the Southwest regions.

The year closed on an upswing for investment activity. More properties sold during the fourth quarter than during any three-month period in more than a decade. Prices rose in 2021; **the median price reached \$45,700 per space**. Cap rates compressed throughout the year, averaging 5.9% for the year and 5.1% in the fourth quarter.

Subject Rate Conclusion

RealtyRates indicates cap rates for mobile home parks have an average rate of 9.00% with a minimum of 5.18% and a maximum of 13.06%.

The band of investment indicates 7.00%.

The investor report indicates a cap rate of approximately 6%.

We are applying a stabilized Real Estate Tax Assessment to forecast year, which accounts for potential after sale tax increases, and hence increases the credibility of the forecast NOI. This lowers the risk profile.

Properties with strong historical income and operating statements, and with lower management expectations garner to more aggressive (lowest) capitalization rates. Projects with higher risk, whether due to vacancy, more park owned homes, or other factor, can sizably increase the appropriate capitalization rate.

The high number of park-owned homes and their management/maintenance costs does affect the appropriate Cap Rate, and pushes it up for increased risk. The subject has a strong income and expense documented history; not all of these facilities offer that, as many are unprofessionally managed.

We conclude that for the subject property an OAR of 7.00% is appropriate.

Direct Capitalization Analysis Conclusion

Based on the above analysis detailed above, we have reconciled to a Fee Simple direct capitalization approach value:

\$1,025,000
One Million Twenty Five Thousand Dollars

Sales Comparison Approach

The Sales Comparison Approach is based on the premise that a buyer would pay no more for a specific property than the cost of obtaining a property with the same quality, utility, and perceived benefits of ownership. It is based on the principles of supply and demand, balance, substitution and externalities. The following steps describe the applied process of the Sales Comparison Approach.

- The market in which the subject property competes is investigated; comparable sales, contracts for sale and current offerings are reviewed.
- The most pertinent data is further analyzed and the quality of the transaction is determined.
- The most meaningful unit of value for the subject property is determined.
- Each comparable sale is analyzed and where appropriate, adjusted to equate with the subject property.
- The value indication of each comparable sale is analyzed and the data reconciled for a final indication of value via the Sales Comparison Approach.

Comparables

We have researched a number of comparables for this analysis; these are documented on the following pages followed by a location map and analysis grid. All sales have been researched through numerous sources, inspected and verified by a party to the transaction, when available.

The subject has 22 mobile home lots and 3 RV lots, and will be analyzed as a 25-unit park.

Sale Comments			

This is the sale of a 34-lot mobile home park located on a lake in Kissimmee, FL. The property contains 3.96 acres, and features a fishing pier on Fish Lake. The park was developed in 1961. This is an all ages park, and the average lot rent is \$365 per month. There is one master water meter at the property, but the park owners installed meters at each lot, and the tenants pay their own water, sewer and electric. There are two sewer lift stations. The County is in the process of taking a small portion at the front of the property in order to widen the road, and compensation is expected to be approximately \$200,000. This will not affect any of the lots. The property was originally listed for \$2,400,000 and then reduced to \$1,900,000 prior to selling for \$1,780,000. The annual gross income is \$150,000 and the expenses are \$31,676, resulting in an NOI of \$118,324. The cap rate is 6.6%.

Sale Comments			

This is the sale of a 34-Unit Mobile Home Park located in Titusville. The Park is known as the Dixie Mobile Home Park and was originally established in 1963. The Mobile Home Park consists of 2.35 Acres with no property amenities. Joanna Hart of Mutter Realty confirmed that the most recent rental range was from \$495-\$625 for most of the manufactured home rentals in the park which vary in size with the average home at approximately 450 Square Feet. Most of the Manufactured and Mobile Homes are in average condition.

This sale was a private transaction and was verified through CoStar and Brevard County Property Appraisers. The sale for \$1,275,000 or \$37,500 per unit/lot.

Sale Comments			

This is the sale of a mobile home park located in Orlando, along Orange Blossom Trail. The park is known as the Palms Trailer Park, with 94 mobile homes, 2 apartments, an office, storage and laundry on 4.62 acres. A total of 96 units. All of the homes are park owned and leased out. The park has city water and septic systems and tenants pay their own electric, the landlord pays the water, trash and common electric, as well as the septic expense. The property was listed for \$4,000,000 and sold for \$3,200,000 after approximately three months on the market. The listing agent reported the NOI is \$470,994 and the sale price of \$3,200,000 indicates a cap rate of 14.72%. The park was first built in 1940.

Analysis and Adjustments

In order to make the comparison meaningful, the comparable sales are reduced to a basic unit of comparison, i.e., the price paid per lot. For Property Rights, Financing, Conditions of Sale, Expenditures After Purchase, and Time-Market Conditions adjustments we have applied Quantitative adjustments. Qualitative analysis is used for the remaining physical features. We have considered each sale in regards to its relative similarity with the subject in the factors noted above. Then a conclusion is drawn in regard to the comparable sale's overall similarity with the subject.

Property Rights

This adjustment is generally applied to reflect the transfer of property rights different from those being appraised, such as differences between properties owned in fee simple and in leased fee.

Financing

This adjustment is generally applied to a property that transfers with atypical financing, such as having assumed an existing mortgage at a favorable interest rate. Conversely, a property may be encumbered with an above-market mortgage which has no prepayment clause or a very costly prepayment clause. Such atypical financing often plays a role in the negotiated sale price.

All of the sales have conventional financing, all cash, or seller financing at market terms, and no adjustments are required.

Conditions of Sale

This adjustment category reflects extraordinary motivations of the buyer or seller to complete the sale. Examples include a purchase for assemblage involving anticipated incremental value or a quick sale for cash. This adjustment category may also reflect a distress-related sale, or a corporation recording a non-market price. No adjustment is required for Conditions of Sale.

Economic Trends

This category reflects investors' perceptions of prevailing market conditions. This adjustment category reflects value changes, if any, which have occurred between the date of the sale and the effective date of the appraisal. In the course of our appraisal work we interview market participants including planning and zoning officials on planned projects, general contractors on costs, and brokers on supply and demand. Overall, we believe an annual time adjustment of 6% per year is appropriate for this property type.

Location

The subject is located in an area that is considered to be Average for a mobile home park. Sales 2 and 6 are considered superior in location as they are beachside and are adjusted downward.

Physical Characteristics

The sales are adjusted qualitatively for physical characteristic differences. We considered the number of units, amenities and view.

Sales 1, 2, 4, 6 and 8 are larger parks with more units, and are adjusted upward. Sale 2 has a river view and Sale 5 has a lake view, and these two sales are adjusted downward. Sale 7 is on a smaller tract of land is adjusted downward.

Sales Comparison Approach Conclusion – Fee Simple

The adjusted values of the comparable properties range on a per lot basis from \$34,160 to \$52,766; the average is \$42,559 per lot and the median is \$39,404 per lot. Sale 6 is the most recent sale; Sale 1 is most proximate and Sale 3 required no adjustment.

Taking into consideration the characteristics of the subject, we reconcile to a value toward the average of the range, at \$43,000 per lot.

Sales Comparison Approach Indication – Fee Simple

Indicated Value per Lot: \$43,000

Subject Size: 25 Lots

Indicated Value: \$1,075,000

Rounded: \$1,075,000

One Million Seventy-Five Thousand Dollars

Final Reconciliation

The process of reconciliation involves the analysis of each approach to value. The quality of data applied, the significance of each approach as it relates to market behavior and defensibility of each approach are considered and weighed. Finally, each is considered separately and comparatively with each other.

Value Indications

Value Perspective	As Is
Cost Approach:	Not Applied
Sales Approach:	\$1,075,000
Income Approach:	\$1,025,000

Cost Approach

The Cost Approach to Value is most applicable for new, nearly new, or proposed improvements which represent the Highest and Best Use for the land. A cost approach was not applied. The Cost Approach is not considered to be a meaningful indicator in this assignment for this property type. The other two approaches carry more weight with knowledgeable market participants.

Sales Comparison Approach

The Sales Comparison Approach is most reliable when the market provides an ample supply of improved comparable sales. A sales approach was applied. Each of the comparable sales are unique in that each one has a variety of features such as the view, the mix of RV lots and mobile home lots, etc. This uniqueness is difficult to account for in this approach which makes this approach slightly less reliable but this value indication is given some weight.

Income Approach – Direct Capitalization

An income approach was applied as the subject is an income producing property and most market participants would rely on this approach. The income to the property could reasonably be estimated via the current actual and market rent data presented, the expenses could be credibly estimated from reported historical data and comparable expense properties and the direct capitalization method is the preferred/most commonly used method by market participants for the subject property type in this market. This approach is given most weight.

Value Conclusion

Based on the appraisal described in the accompanying report, subject to the Limiting Conditions/Assumptions and Extraordinary Assumptions, we have made the following value conclusion:

The Fee Simple Market Value for the subject property,
as of April 7, 2022 is:

One Million Fifty Thousand Dollars
\$1,050,000

Certification

We certify that, to the best of our knowledge and belief:

1. The statements of fact contained in this report are true and correct.
2. The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are our personal, impartial and unbiased professional analyses, opinions, and conclusions.
3. We have no present or prospective interest in or bias with respect to the property that is the subject of this report and have no personal interest in or bias with respect to the parties involved with this assignment.
4. Our engagement in this assignment was not contingent upon developing or reporting predetermined results.
5. Our compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.
6. This appraisal assignment was not made, nor was the appraisal rendered on the basis of a requested minimum valuation, specific valuation, or an amount which would result in approval of a loan.
7. The reported analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the requirements of the Code of Professional Ethics and the Standards of Professional Appraisal Practice of the Appraisal Institute, which include the Uniform Standards of Professional Appraisal Practice.
8. The use of this report is subject to the requirements of the Appraisal Institute relating to review by its duly authorized representatives.
9. Jason C. Malick, Trainee RI25267, provided significant help in site and building inspection and descriptions, tax and zoning analysis, and research of comparison sales.
10. I, the supervisory appraiser of a registered trainee appraiser who contributed to the development or communication of this appraisal, hereby accept full and complete responsibility for any work performed by the registered trainee appraiser named in this report as if it were my own work.
11. As of the date of this report, Matthew Jehs, MAI has completed the continuing education program of the Appraisal Institute.
12. We have made an inspection of the property that is the subject of this report.
13. The appraisers have not performed a prior appraisal or any services regarding the subject property performed by the appraiser, as an appraiser or in any other capacity, within the three-year period immediately preceding the agreement to perform the assignment.

Addenda

Definitions

Market Value: As defined by the Office of the Comptroller of Currency (OCC) under 12 CFR, Part 34, Subpart C-Appraisals, 34.42 Definitions, the Board of Governors of the Federal Reserve System (FRS) and the Federal Deposit Insurance Corporation in compliance with Title XI of FIRREA, as well as by the Uniform Standards of Appraisal Practice as promulgated by the Appraisal Foundation, is as follows.

Market value means the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby,

1. Buyer and seller are typically motivated;
2. Both parties are well informed or well advised, and acting in what they consider their own best interest;
3. A reasonable time is allowed for exposure in the open market;
4. Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and
5. The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

A **Fee Simple** interest is defined² as:

Absolute ownership unencumbered by any other interest or estate, subject only to the limitations imposed by the governmental powers of taxation, eminent domain, police power, and escheat.

A **Leased Fee** interest is defined² as:

An ownership interest held by a landlord with the rights of use and occupancy conveyed by a lease to others. The rights of the lessor (the leased fee owner) and the leased fee are specified by contract terms contained within the lease.

² Appraisal Institute, *The Dictionary of Real Estate Appraisal*, 4th ed. (Chicago: Appraisal Institute, 2002).

Marketing Time is defined² as:

1. The time it takes an interest in real property to sell on the market subsequent to the date of an appraisal.
2. Reasonable marketing time is an estimate of the amount of time it might take to sell an interest in real property at its estimated market value during the period immediately after the effective date of the appraisal; the anticipated time required to expose the property to a pool of prospective purchasers and to allow appropriate time for negotiation, the exercise of due diligence, and the consummation of a sale at a price supportable by concurrent market conditions. Marketing time differs from exposure time, which is always presumed to precede the effective date of the appraisal. (Advisory Opinion 7 of the Appraisal Standards Board of The Appraisal Foundation and Statement on Appraisal Standards No. 6, "Reasonable Exposure Time in Real Property and Personal Property Market Value Opinions" address the determination of reasonable exposure and marketing time.)

Exposure Time is defined² as:

The time a property remains on the market.

1. The estimated length of time the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal; a retrospective estimate based on an analysis of past events assuming a competitive and open market. Exposure time is always presumed to occur prior to the effective date of the appraisal. The overall concept of reasonable exposure encompasses not only adequate, sufficient and reasonable time but also adequate, sufficient and reasonable effort. Exposure time is different for various types of real estate and value ranges and under various market conditions. (Appraisal Standards Board of The Appraisal Foundation, Statement on Appraisal Standards No. 6, "Reasonable Exposure Time in Real Property and Personal Property Market Value Opinions")

Market value estimates imply that an adequate marketing effort and reasonable time for exposure occurred prior to the effective date of the appraisal. In the case of disposition value, the time frame allowed for marketing the property rights is somewhat limited, but the marketing effort is orderly and adequate. With liquidation value, the time frame for marketing the property rights is so severely limited that an adequate marketing program cannot be implemented. (The Report of the Appraisal Institute Special Task Force on Value Definitions qualifies exposure time in terms of the three above-mentioned values.) See also marketing time.

As Is Value

The value of specific ownership rights to an identified parcel of real estate as of the effective date of the appraisal; relates to what physically exists and is legally permissible and excludes all assumptions concerning hypothetical market conditions or possible rezoning. ²

**PROFESSIONAL QUALIFICATIONS
OF
MATTHEW W. JEHS**

EXPERIENCE: Current Managing Director for Tuttle-Armfield-Wagner Appraisal & Research, Inc., Mr. Jehs has 20 years of appraisal experience, receiving his MAI in 2008. He has performed property valuations for a broad array of retail, industrial, and office properties including shopping centers, office/warehouses, bulk distribution warehouses, heavy manufacturing, both low-rise and high-rise professional offices and medical office buildings. Valuations have also included surgical centers, limited-service hospitality properties, condominium developments and conversions, residential subdivisions, and vacant land. Specialized real estate assignments include right-of-way projects, Cape Canaveral Port Facilities, Kennedy Space Center assets, and Melbourne Airport Aviation land, and jurisdictional wetlands. Clients served include accountants, investment firms, law firms, lenders, private corporations, local municipalities, and public agencies, including Veterans Affairs, Florida DEP Approved Appraiser, and SJRWMD. Valuations have been utilized for mortgage loan purposes, equity participation, due diligence support, condemnation proceedings and insurance purposes. Assignments have included the valuation of existing and proposed properties, as well as market studies, highest and best use studies, and property value impact studies.

**LETTER TO CONFIRM AUTHORIZATION
TO PERFORM APPRAISAL SERVICES**

The **CLIENT**, Victor C. Raynor Revocable Trust, has hereby requested and authorized TUTTLE-ARMFIELD-WAGNER APPRAISAL & RESEARCH, INC. (TAW) to proceed with the following work:

Appraisal of 8.25 Acres improved with 21 Manufactured Housing Spaces
located at the NW corner of Camp Rd. and N. Highway 1 Cocoa, FL 32927

The purpose of the appraisal will be to estimate the current Fee Simple Market Value. The Appraisal Report will be prepared in conformance to the Uniform Standards of Professional Appraisal Practice. We have not appraised this property in the last 3 years and are competent to perform this appraisal assignment.

The appraisal will be completed by 5 weeks from notice to proceed.

The **CLIENT** acknowledges responsibility for payment of professional fees.

Payment for said work shall be a Total Fee of \$3,500. Payment is due before delivery of the report. At time of engagement, an invoice will be sent out. Payment can be made with check or credit card; however, any credit card transaction fees would be an additional charge.

The **CLIENT** agrees that unpaid invoices shall accrue interest based on a rate of twelve percent (12%) per annum, after they have been outstanding/unpaid for 30 days after date of invoice.

If **TAW** employs legal services to collect overdue amounts, the **CLIENT** agrees to pay all costs of collection, including reasonable attorney's fees, whether action is brought or not.

Thank you for the opportunity to provide our services.
